LADY'S MASTER BATH: This bathroom is designed to give the lady of the house the feeling of a luxurious spa. One of the crowning jewels of this room is the faucets and fixtures imported from France. The lavatory faucet valves are made by Lalique Crystal Company. The tub and sink are from one of our favorite companies, Victoria & Albert. The countertops are Calacatta marble. Wall and field tiles are custom-designed and handmade for this project from Calacatta marble. The toilet is another great piece in this bathroom—a bidet and toilet combo with a heated seat. The automatic lid opens as you approach, with different settings for ladies and gentlemen.

MASTER BEDROOM: The master bedroom is one of the most important rooms in the house because this is the room in which each day starts and ends. We believe the design should be calm and relaxed to rejuvenate the body and soul. The fabrics selected are light shades of pastel with soft floral and geometric patterns designed to be appealing to the couple who will be occupying this room. The room is decorated with custom-made and antique furniture. The walls are Venetian polished plaster finish, and soft lighting is used to show the beautiful textures.

GENTLEMAN'S MASTER BATH: This bathroom has beautiful cherry wood paneling. The floors and the countertop are sand-color limestone. The shower area and the walls around the toilet are Emprador marble tiles.
